PROFILE

Final semester CSE student with a strong academic record and hands on experience in software development and quality assurance. Completed professional training on Software Quality Testing, gained practical experience in manual testing, regression testing, API testing and a solid understanding of SDLC and STLC. Eager to apply my technical skills and contribute to ensuring reliable user experience through collaboration and mentorship.

ACADEMIC QUALIFICATION

B.Sc in Computer Science & Engineering (Final Semester)

2021 - Present

Jagannath University

CGPA : 3.83

PROJECTS

Finance Tracker App (Manual Testing & Bug Reporting)

- Designed and executed 35+ manual test cases covering transaction management, balance calculation, tracking and reporting modules.
- Performed functional and regression testing for two testing cycles to verify application behavior after fixes.
- Identified 8+ bugs and documented them with reproduction steps, expected/actual results and severity information.

Task Management App (Manual Testing)

- Designed and executed manual test cases for task creation, editing, deadline management and notification functionalities.
- Performed regression testing after bug fixes to verify and ensure existing features are working perfectly.

Flaggr - Harmful Speech Detection Chatbot | Academic Project

Tech Stack : Python, React, Flask, BERT, Postman

- Developed a BERT based multi-label classifier for detecting hate speech and integrated the model into a Flask REST API and React interface with real time moderation and severity classification.
- Performed API testing using Postman, validated API endpoints, request/response payload, status codes and model responses in different situations.

Cloud-Vote (Online Voting Platform) | Academic Project

Tech Stack: React, ASP.NET, MySQL, Docker, CI/CD Automation

- Developed an online voting platform using React and ASP.NET, containerized with Docker and integrated with CI/CD pipelines for automated build verification.

EXPERIENCE & ACTIVITIES

Instructor - Scholars' University Admission Coaching - Planned and delivered structured lectures for university admission candidates. - Prepared study materials, tracked student progress and adjusted content delivery based on learning outcomes.	2025 - 2026
Top 6 Finalists, Case Competition Techathon Nationals & Rover Summit, IUT Robotics Society	2026
Finalist, 3 Minute Thesis Sciblitiz 2.0, IEEE CUET Student Branch	2026
2nd Runners Up, Project Showcase 15 th CSE Day, Jagannath University	2025
Winner, Idea Pitch Competition IEEE WIE DAY 2024, WIE JnU Student Branch Affinity Group.	2024

SKILLS

Quality Assurance: Manual Testing, Functional Testing, Regression Testing, API Testing, Bug Reporting, SDLC, STLC, Selenium (Basic), SQL Validation

Programming: Python, C++

Web Development: HTML/CSS, React, JavaScript, Tailwind

Database Management: MySQL, PostgreSQL, SQLite

Tools: Postman, Docker, Git/GitHub, Excel, MS Office, Power BI

Soft Skills & Languages: Communication, Teaching, Time Management | English (Fluent), Bangla (Native)

CERTIFICATIONS

• Software Testing and Training Program Bangladesh Computer Council	Dec 2024 - April 2025
• Business Analytics with Power BI Masterclass Unbolt Academy	2026
