PROFILE

A motivated final semester Computer Science and Engineering student with a strong academic record and hands-on experience in Machine Learning, Software Development and Testing Projects. Proven ability to apply structured, data-driven thinking through academic research and technical projects. Inquisitive and highly engaged in working with data and figures, with experience of collaborating across diverse teams. As a curious and proactive learner, I am eager to bring my analytical ability and managements skills to real world challenges and grow professionally

ACADEMIC QUALIFICATION

B.Sc in Computer Science & Engineering (Final Semester)

2021 - Present

Jagannath University

CGPA : 3.83

Higher Secondary Certificate (HSC)

Ideal School and College, Motijheel

2018 - 2020

GPA : 5.00

Secondary School Certificate (SSC)

Anandamayee Girls' High School

2016 - 2018

GPA : 5.00

EXPERIENCE & ACTIVITIES

Scholars' University Admission Coaching

Math Instructor

2025 - 2026

• Provided structured math lectures and prepared materials for university admission candidates.

JnU CSE Club

Executive Member

2025 - Present

• Responsible for organizing technical events, skill-development workshops and student engagement activities within the department.

IEEE JnU Student Branch

General Member

2023 - 2024

• Engaged actively in professional activities promoting knowledge, networking and industry collaboration.

CSE DAY, Jagannath University

Team Lead

2024

• Managed a team in planning, coordinating and executing the department's annual event.

ACADEMIC PROJECTS

Hate Speech Detection Chatbot

Tech Stack : Machine Learning, Transformers, Python, Flask, SQLite

- Implemented a chatbot using baseline models (Random Forest, TF-IDF) and advanced BERT-based models (Distil-BERT, BERT with Logistic Regression).

CNN Based Insect Detection Model

Tech Stack : ResNet50, EfficientNetB2, Python

- Trained and fine tuned CNN Based Models to detect and classify disease carrying insects.

Cloud-Vote (Cloud Based Online Voting System)

Tech Stack : React, ASP.NET, Docker, CI/CD Automation

- Built a modern and responsive web based voting system with implementation of cloud infrastructure and deployment strategies like Docker containerization, automated CI/CD pipelines and dynamic autoscaling (ongoing).

Diabetes Prediction Application using Python

Tech Stack : Machine Learning, Python

- Developed a web based diabetes prediction application in Python based on machine learning models(Random Forest, XGBoost) to predict diabetes risk from user-provided health data.

Campus-Jatra (University Transport Tracking System)

Tech Stack : Flutter, Google Maps API, GPS Module

- Designed and developed a real-time vehicle tracking mobile application for Jagannath University transport services with the core tracking module for precise live location data.

Home-Scope (Real Estate Website)

Tech Stack : HTML, CSS, JavaScript, PHP

- A real estate website where users can buy, sell or rent properties with a chatbot agent.

ACHIEVEMENTS

Top 6 Finalists, "BizComp"

2026

Techathon Nationals & Rover Summit, Organized by IUT Robotics Society

Winner, "Mastering the Art of Presentation"

2024

Presentation competition organized by WIE JnU Student Branch Affinity Group.

SKILLS & CERTIFICATION

Technical Skills: Programming (C++, Python), Software Testing, Web Development (HTML, CSS, JavaScript, React), Database Management

Soft Skills: Leadership, Communication, Time Management, Teaching

Tools & Platform: MS Office (Word, PowerPoint), Excel (Intermediate Level), Google Workspace, Docker, Postman, Android Studio

Languages: English (Fluent), Bangla (Native)

Certification:

- Software Testing and Training Program - 2025 | Bangladesh Computer Council (EDGE Project)
- Business Analytics with Power BI Masterclass - 2026 | Unbolt Academy
